Drawing Exercise #13

STEP BY STEP

Today you are going to draw the things outlined below, but IN ORDER, without knowing what the next step will be (it's best to get a piece of paper right now and hide the steps, and then only reveal them one by one). Don't worry about where the drawing is headed, but just enjoy working each new element into your existing composition. And have fun!

1. Draw three diagonal lines any length, anywhere in the box above.

2. Draw one square and one circle, any size.

3. Draw 10 dots.

4. Draw three curved or curvy lines, making sure they overlap some of your previous marks.

5. Draw three triangular shapes, any size.

6. Draw one horizontal line, any length.

7. Fill in some of the shapes you've created with solid black.

8. Now look at what you've drawn carefully. Add anything you like to complete your design!
